ELECTRICAL WIRING SAFETY INSPECTION

THIS FORM APPLIES TO SERVICES THAT HAVE BEEN DISCONNECTED FROM STEARNS ELECTRIC ASSOCIATION'S DISTRIBUTION SYSTEM FOR ONE OR MORE YEARS AND NO NEW ELECTRICAL WORK HAS BEEN PERFORMED AS PART OF NEW CONSTRUCTION, REMODELING, REPLACEMENT OR REPAIR.

In these cases Stearns Electric requires that a licensed electrical contractor perform an inspection of the service's wiring prior to reconnection. Members requesting a service reconnect that meets the above criteria shall submit this completed form signed by a licensed electrical contractor before Stearns Electric will schedule the service reconnection.

Services where new electrical work has been performed as part of new construction, remodeling, replacement or repair require that a Request for Electrical Inspection be filed with the Minnesota Department of Labor and Industry.
