

WHAT ARE LOAD MODIFYING RESOURCES (LMRS)?

On June 1, 2022 our wholesale power provider, Great River Energy (GRE), registered all Stearns Electric Association's Interruptible Program accounts, as Load Modifying Resources (LMRs) in the regional electricity market (MISO). Registered LMRs are required to respond to MISO dispatch signals during peak energy events and energy emergencies.

Registered LMRs are required to control their energy load whenever it is called for by MISO. Member loads may be controlled for up to 300 hours per calendar year, up to ten (10) hours per occurrence. This can be any time of the day, including holidays and weekends. Registered LMRs must respond to control events with a minimum notification of 30 minutes, and follow program requirements listed in the Interruptible Program Agreement.

In return, Interruptible Program participants receive Stearns Electric Association's reduced energy rate. The Cooperative will send out load control notifications as requested. To sign up for notifications or to change your contact information, contact the Stearns Electric's Energy Services department.

Interruptible Program participants are responsible to ensure that their generator(s) remain in compliance and that during control periods, their energy usage reduces to at or below the Pre-Determined Level (PDL) as noted on our Interruptible Agreement.

For full program requirements, please contact John Pantzke, Manager of Energy Services, at (800) 962-0655 or jpantzke@stearnselectric.org.

Load Management Schedule

Thu Jan 18, 2024 - 11:58 PM CPT

Today	Program Type	Probability	Expected Time (CPT)
CI	C&I Interruptible Metered	Unlikely	Undetermined
CI	C&I with GenSet	Unlikely	Undetermined
CI	Interruptible Crop Driers	Unlikely	Undetermined
Residential	Cycled Air Conditioning	Unlikely	Undetermined
Residential	Dual Fuel	Scheduled	06:00 AM - 10:30 AM
Residential	Dual Fuel	Scheduled	03:30 PM - 08:30 PM
Residential	Interruptible Water Heating	Scheduled	05:45 AM - 09:45 AM
Residential	Interruptible Water Heating	Scheduled	04:00 PM - 08:00 PM

Next Day	Program Type	Probability	Expected Time (CPT)
CI	C&I Interruptible Metered	Unlikely	Undetermined
CI	C&I with GenSet	Unlikely	Undetermined
CI	Interruptible Crop Driers	Unlikely	Undetermined
Residential	Cycled Air Conditioning	Unlikely	Undetermined
Residential	Dual Fuel	Unlikely	Undetermined
Residential	Dual Fuel	Unlikely	Undetermined
Residential	Interruptible Water Heating	Unlikely	Undetermined
Residential	Interruptible Water Heating	Unlikely	Undetermined

Control times are subject to change as weather conditions and other variables affecting the load change. All times are approximate.
